RE: Occupational Hygiene and Safety program

Date: January 13, 2021

We are proposing to inactivate the Occupational Hygiene and Safety program (BS3300) and are suspending admissions immediately in anticipation of approval of this request.

The OHS program is currently functioning with adjunct instructors due to the early retirement of the program coordinator/faculty member in May 2020. No current faculty will be affected by this program closure.

There are currently 9 students in the program, and they will all be able to complete the degree because courses, or substitutions will be available. Two of the 9 students will graduate at the end of Spring 2021.
